

SOHAIL SHAIKH

DATA ANALYST

+91-9890647135 · Pune, Maharashtra, India · sohail0499@gmail.com · [Linkedin](#) · [Github](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 1+ years of hands-on experience in data collection, data cleaning, data analysis and visualization. Proficient in SQL, Python, Power BI, Excel by interpreting complex datasets and deriving actionable insights. A quick learner with strong problem-solving skills, coupled with a keen interest in leveraging data, applying analytical skills to solve complex business problems and contribute to the success of a dynamic team.

WORK EXPERIENCE

Cognifyz Technologies Power BI Data Analyst

Pune, Maharashtra
December 2024 - Present

- Assist in gathering data from various sources such as databases, spreadsheets, APIs.
- Clean and prepare data for analysis, including handling missing values and outliers.
- Learned and applied basic data modeling concepts within Power BI.
- Built and maintained data models using Data Analysis Expressions (DAX) for efficient data analysis.
- Developed basic dashboards and reports using Power BI Desktop.
- Learned to use basic interactive elements (slicers, filters) to enhance user experience.
- Performed basic data analysis to identify trends and patterns.
- Assist in interpreting data visualizations and drawing preliminary insights.
- Actively participated in training sessions and workshops on Power BI and data analysis.

Whiz.ai Data Analyst

Pune, Maharashtra
July 2021 - October 2022

Provided Johnson & Johnson with sophisticated data solutions while serving as a Software Engineer or Data Analyst/Data Engineer on the CVM (Cardio Vascular Muscle) project.

- Streamlined data extraction techniques and optimized intricate SQL queries to improve ETL processes. Parallel execution techniques were used to reduce processing time for ETL processes by spotting possible bottlenecks before they affected consumers.
 - Optimized data analysis procedures by simplifying Python scripts and automating repetitive operations, and decreased data processing time through effective code restructuring and performance optimization strategies.
 - Cronjob was implemented to schedule DAG in Airflow.
 - Assisted in the creation of a user-friendly dashboard that employs Python-based visualization tools to enable real-time monitoring of critical business metrics.
 - Delivered data-driven recommendations to senior leadership, which influenced the development of critical business strategies and fostered a data-centric culture within the organization.
 - Developed customized reports, summarizing and presenting data in a visually appealing format, and analyzed data to identify the fundamental causes of problems and recommend corrective actions.
 - Implemented effective debugging strategies, resulting in fewer software defects and increased reliability.
 - Achieved an increase in data accuracy by implementing thorough validation checks and error handling mechanisms.
 - Established efficient communication channels within the team, leading to better collaboration among members during project development phases.
 - Increased code maintainability through diligent documentation of changes made during each revision cycle.
 - Maximized development efficiency using version control systems like Git to manage source code effectively.
 - Collaborated with stakeholders to identify business needs and data sources.
-

PROJECTS

Diwali Sales Data Analysis using Python

- Analyzed Diwali sales data and improved customer experience by identifying potential customers across different states, occupation, gender, age groups as well as forecasted sales by identifying the most selling product and product categories thereby helping to plan inventory and hence meet the demands.
- **Skills** : Python (Pandas, Matplotlib, Seaborn), Data Cleaning, EDA, Data Visualization

Digital Music Store Analysis using SQL

- Analyzed music store data and utilized SQL queries to solve key business problems, such as identifying top-selling genres, tracking customer purchasing trends, and optimizing inventory by pinpointing underperforming products thereby deriving actionable business insights.
- **Skills** : Aggregate functions, SQL joins, SQL query optimization, CTEs, Subqueries

HR Analytics Dashboard using Power BI

- Developed expertise in data modeling, visualization, and analysis using Power BI. Identified key factors to reduce attrition, improved hiring process, improved employee experience, made workforce more productive and gained employee trust thereby enabling effective HR decision-making by solving business problems such as employee turnover, performance tracking, and workforce optimization.
- **Skills** : Power Query, DAX commands, Data Integration, Data Modeling, KPI Reporting, Data Visualization, Dynamic Filtering, User Experience Design

SKILLS

- | | | | |
|-------------------|------------------|----------------|------------------------|
| • Python | • PostgreSQL | • NumPy | • Machine Learning |
| • MySQL | • Tableau | • Pandas | • Amazon Redshift |
| • NoSQL | • Apache Spark | • Matplotlib | • Confluence |
| • Microsoft Excel | • Statistics | • Seaborn | • JIRA |
| • Power BI | • Data Wrangling | • Scikit-learn | • Git/Gitlab/Bitbucket |
-

EDUCATION

Pimpri Chinchwad College of Engineering & Research, Ravet, Pune (August 2017- June 2021)

(B.E.(Bachelors of Engineering) in Computer Engineering

CGPA : 7.9/10

- Final year Project : Age & Gender Detection using ResNet CNN

Kamalnayan Bajaj Higher Secondary School, Sambhaji Nagar, Pune (February 2016 - March 2017)

Higher Secondary Certificate (H.S.C)

Percentage : 72.6

Kamalnayan Bajaj High School, Sambhaji Nagar, Pune (March 2014 - April 2015)

Secondary School Certificate (S.S.C)

Percentage : 87.2

CERTIFICATIONS

- Python for Everybody Specialization by University of Michigan | Coursera
 - Google Data Analytics Specialization by Google | Coursera
 - Microsoft Power BI Data Analyst Specialization by Microsoft | Coursera
